Papers of the North of England Institute of Mining and Mechanical Engineers

NRO 3410/Bud

Buddle Collection

Creator(s): Buddle, John, d 1843, colliery viewer Buddle, John, d 1806, colliery viewer
Immediate Source of Acquisition The papers were presented to the Mining Institute by Buddle Atkinson, a descendant of John Buddle's nephew, in various installments.
Scope and Content The Buddle Collection comprises the working papers of John Buddle, d.1843; with some papers of his father, also John, d. 1806 and papers of other viewers collected by the Buddles in the course of their work The major part of the collection is a series of report and memoranda books compiled by John Buddle junior together with colliery journals and diaries of work. The collection also contains colliery notebooks of John Buddle senior, a series of lining books, personal papers and a collection of bound volumes of the papers of Thomas Young Hall, mining engineer, also collected by the Buddle Atkinson family

NRO 3410/Bud/106-135

Lining Books.

Creation dates: 1793-1858

Scope and Content

Series of notebooks containing rough working notes of linings (measurements taken in surveying the mine) for various collieries, 1793 - 1858.

Most of the volumes have 2 sets of original number sequences, Bud/106 - 127 are numbered XIX. 30 - XIX. 51 consecutively and Bud/106 - 133 numbered D.11. 1 - 28 and D.12.1, this latter series corresponding to numbers in the original Watson Catalogue suggesting that these volumes are strays from the Watson Collection. Both original numbers are given in brackets in the list, in some cases parts of the Watson numbers have been torn away and this is indicated by square brackets. In both original number sequences, one number only has been given to each colliery, this has been adhered to and sub-numbers have been given if there is more than one notebook to a colliery.
